

TURBOCAM
INTERNATIONAL

**Latest Developments
Fall 2010**

TURBOCAM continues to expand its **Electrochemical Machining (ECM)** facilities in Dover, New Hampshire and now also offers **Wire Electrical Discharge Machining (Wire EDM)**. ECM and EDM are a great fit for components with material requirements or features that are difficult, or even impossible, to machine by traditional methods.

TURBOCAM has a patent pending for the manufacture of **integrally shrouded impellers**. This innovative and cost-effective approach may be the solution for companies requiring the strength of an integrally shrouded impeller, but whose market demands lower and lower prices.

Due to increased worldwide demand for **gas and steam turbine blades and vanes**, we have added new manufacturing facilities in Romania (TURBOCAM Romania SRL) and in the USA to the two existing locations in the UK and India.

Cummins Turbo Technologies named TURBOCAM as its **Supplier of the Year** for both 2008 and 2009. TURBOCAM was chosen for its "high quality goods and services, dedication to efficiency and cost cutting, and commitment to public service."

TURBOCAM recently completed the addition to its manufacturing plant in the USA housing its growing **TURBOCAM Aerospace (T-Aero)** division. From air cycle machines that keep customers cool on the 737 to pump impellers that keep the International Space Station habitable, T-Aero is a leader in the manufacture of demanding aerospace prototype and production components.

TURBOCAM manufactures **golf putter heads** via 5-axis machining from a single forging that integrates never-before-seen design elements and favorite performance features of the world's putting masters.

A semi-automated cell for **high-volume balancing** of automotive impellers is being constructed in the USA.

Our unique **TX1 metal treatment technology** is now being applied in production on a number of applications.

From 2007 to 2010, TURBOCAM has been listed as one of the **fastest growing companies in America** by *Inc. Magazine*.

In September 2010, TURBOCAM celebrated its **25th anniversary**. We are thankful to God for our dedicated employees, talented suppliers, and loyal customers who help make our success possible.
